

## Assingment 1 CRC

### MyCalendar

|                               |                              |
|-------------------------------|------------------------------|
| Collect Event objects         | Event                        |
| Read/write to event save file | File                         |
| Print day and month view      | FileWriter<br>BufferedWriter |
| Create Event                  | FileReader<br>BufferedReader |
| List all events               |                              |
| Delete selected event         |                              |
| Delete Recurring event        |                              |
| Delete all events             |                              |

### Event

Hold name and TimeInterval of ev  
Check for conflict with another ev

### MyCalendarTester

|                                            |            |
|--------------------------------------------|------------|
| Driver class                               | MyCalendar |
| Methods for each menu and submenu          | Event      |
| Handle retrieval and storage of user input |            |

### TimeInterval

Hold Starting LocalDateTime and  
Check for overlap with another int

|                      |               |
|----------------------|---------------|
|                      |               |
|                      |               |
| rent                 | MyCalendar    |
| ent                  | TimeInterval  |
|                      |               |
|                      |               |
| ending LocalDateTime | LocalDateTime |
| terval               |               |
|                      |               |
|                      |               |
